

Original paintings of Canadian flora and mushrooms by Agnes Chamberlin (1833-1913). ca.1863-1900s. Subscription books for Chamberlin's Canadian Wildflowers, 1868 and 1869 editions. Original paintings and photographs of Canadian flora and other subjects by Geraldine Moodie, Agnes Chamberlin's daughter (1854-1945). ca.1902-1934. Album of pressed plants by Geraldine Moodie. Album of pressed ferns by Catherine Parr Traill.

Extent: 21 boxes.

The Agnes Chamberlin material was donated to the Botany Department of University of Toronto in 1935 by the heirs of the artist. At the same time Geraldine Moodie, daughter and one of Agnes Chamberlin's heirs, donated her own paintings and photographs of botanical subjects. The collection was transferred to the Rare Books Department of the University of Toronto Library in 1966.

Most of the paintings have not been reproduced. In 1868 Agnes Chamberlin published ten watercolours in her book Canadian Wildflowers. Nine more paintings were reproduced as illustrations for C. P. Traill's work, Studies of Plant Life in Canada, published in 1885. Twelve additional paintings were reproduced in black and white for the second edition of Studies of Plant Life published in 1906. Four paintings of mushrooms were reproduced in a report on edible fungi published by the Geological Survey. A selection of the paintings has been exhibited several times in different locations (see following chronology).

Geraldine Moodie's work has remained unpublished. A collection of her Arctic photographs has been donated to the British Museum. Additional photographs are in the Medicine Hat Art Gallery.

The Fisher Library contains a special collection of published books illustrated by Chamberlin which is entitled the Agnes Dunbar (Moodie) Chamberlin Collection. It contains several editions of Canadian Wildflowers and two editions of Studies of Plant Life.

PHOTOGRAPHS BY GERALDINE MOODIE

Boxes 15-18 Glass and film negatives of photographs of plants.

Plants appear to be primarily from the Hudson Bay region. One is labelled "Churchill, 1908". Negatives are numbered in sequence from 3 to 83 but many nos. are missing and several are unnumbered. Notes in Moodie's hand are on the envelopes.

"Owing to the difficulty in carrying plates on our journeys I was obliged to use mostly very small plates ... My plan was to enlarge and color them but now at my age (80) I must give up all idea of doing the work myself." (G. Moodie to R.B. Thomson, Nov. 28, 1934)

"I am not a botanist and have refrained from putting names on any of them ... the notes I did make refer mostly to the coloring, as I was depending on Mr. Macoun to name them for me." (G. Moodie to R.B. Thomson, Jan. 8, 1935)

"I put in a very lonely three years climbing over rocks and hills to procure the plants, and then photographing them with anything but professional appliances." (G. Moodie to R.B. Thomson, Mar. 4, 1937)

Box 19 **CORRESPONDENCE AND PAPERS RE AGNES CHAMBERLIN COLLECTION**
