Papers by A. G. Huntsman

(I. 50+ copies. II. 10+ copies  
III. 1+ copies. IV. 0 copy)

1001

1912. (a) Holosomatous ascidians from the coast of western Canada. Contrs. Can. Biol. (1906-1910): 103-185. Plates 10-21. IV
- (b) Ascidians from the coasts of Canada. Trans. Can. Inst. (1911), 9: 111-148. I
1913. (a) The classification of the Styelidae. Zoologischer Anzeiger, 41: (11): 482-501. 13 figs. in text. II
- (b) Protostigmata in ascidians. Proc. Roy. Soc., Sect. B, 86: 440-453. 2 figs. in text. IV
- (c) On the origin of the ascidian mouth. Proc. Roy. Soc., Sect. B, 86: 454-459. 2 figs in text. IV
- (d) Invertebrates other than insects and mollusks. In the Natural History of the Toronto Region Ontario, Canada (edited by J. H. Faull): 272-287. Toronto. Can. Inst. I
1915. (a) A new caprellid from the Bay of Fundy. Contrs. Can. Biol. (1911-1914): Fasc. 1: 39-42. Plates 5 and 6. IV
- (b) The fresh water Malacostraca of Ontario. Contrs. Can. Biol. (1911-1914): Fasc. 2: 145-163. 13 figs. in text. IV
1917. (a) Concerning some Ontario crayfishes. Ottawa Nat. (Jan. 1917), 30: (10): 130-132. III
- (b) The lampreys of eastern Canada. Ottawa Nat. (May, 1917), 31: (2): 23-27. II
1918. (a) Histories of new food fishes. I. The Canadian Plaice. Canada, Biol. Bd., Bull. No. 1 (Mar., 1918): 1-32. I
- (b) The history of a fish. Can. Fisherman (Apr., 1918), 5: (4): 690-694. IV
- (c) Fisheries research in the Gulf of St. Lawrence in 1917. Can. Fisherman (May, 1918), 5: (5): 740-744. I
- (d) Our eastern flat-fishes. Can. Fisherman (June, 1918), 5: (6): 788-790. I
- (e) Fishery resources of our Atlantic coast. Can. Fisherman (Aug., 1918), 5: (8): 898-903. IV

1918. (f) Fishery prospects for Hudson and James Bay. Can. Fisherman (Aug., 1918), 5: (8): 896-898. IV
- (g) Where live the lobsters of the Gulf? St. Andrews, New Brunswick. The Beacon (Nov. 9, 1918). IV
- (h) Report on affected salmon in the Miramichi River, New Brunswick. Contrs. Can. Biol. (1917): 169-173. II ✓
- (i) The scale method of calculating the rate of growth in fishes. Trans. Roy. Soc. Canada, Ser. 3, 12: Sect. 4: 47-52. II
- (j) The vertical distribution of certain intertidal animals. Trans. Roy. Soc. Canada, Ser. 3, 12: Sect. 4: 53-60. II
- (k) The effect of the tide on the distribution of the fishes of the Canadian Atlantic coast. Trans. Roy. Soc. Canada, Ser. 3, 12: Sect. 4: 61-67. II ✓
1919. (a) Sewage and fishes. Can. Fisherman (Feb., 1919), 6: (2): 41. IV
- (b) Lakes and fishes. Can. Fisherman (May, 1919), 6: (5): 148-152. I ✓
- (c) British versus Canadian fish names. Can. Fisherman (May, 1919), 6: (5): 156-157. IV
- (d) The growth of the scales in fishes. Trans. Roy. Can. Inst. (May, 1919), 12: (27): Part 1: 61-101. IV
- (e) Research and the fishing industry. Can. Fisherman (June, 1919), 6: (6): 194-195. IV
- (f) Variation of fishes according to latitude. Science (Dec. 26, 1919), 50: (1304): 592-593. IV
- (g) The growth of fishes. Trans. Am. Fish. Soc. (Dec. 1919), 49: (1): 19-23. II ✓
- (h) Growth of young herring (so-called sardines) of the Bay of Fundy. Canada, Dept. Naval Service, Sessional Paper No. 38b: Can. Fish. Exped. (1914-1915): 165-171. IV
- (i) Biology of Atlantic waters of Canada. Some quantitative and qualitative plankton studies of the eastern Canadian plankton. Canada, Dept. Naval

- 1919 (i) Service, Sessional Paper No. 38b: Can. Fish. Exped. (1914-1915): 405-485.
- (j) Our heritage of lake and river. Proc. Ont. Educational Assn. (Apr. 21-24, 1919): 412-419. IV
- 1920 (a) Life under water. Can. Fisherman (Feb., 1920), 7: (2): 32-34. IV
- (b) International investigation of the ocean. Can. Fisherman (June, 1920), 7: (6): 68-72. IV
- (c) The standardization of the trade names of fishes and other marine products. Can. Fisherman (June, 1920), 7: (6): 115-120. IV
- (d) Cold storage investigations. Can. Fisherman (Dec., 1920), 7: (12): 265-266. IV
- 1921 (a) Faunal notes from the Atlantic Biological Station (1920). Can. Field Nat. (Jan., 1921), 35: (1): 1-7. (By A. Willey and A. G. Huntsman). IV
- (b) Age-determination, growth and symmetry in the test of the ascidian, Chelyosoma. Trans. Roy. Can. Inst. (Feb., 1921), 13: Part 1: (29): 27-38. Plate 1. II
- (c) Eastern Canadian plankton - The distribution of the Tomopteridae obtained during the Canadian Fisheries Expedition, 1914-1915. Contrs. Can. Biol. (1918-1920): 85-91. I
- (d) Eastern Canadian plankton. - The distribution of floating tunicates (Thaliacea) obtained during the Canadian Fisheries Expedition, 1914-1915. Contrs. Can. Biol. (1918-1920): 93-97. II
- (e) Climates of our Atlantic waters. Trans. Am. Fish. Soc. (1920), 50: 326-333. III
- (f) The success of reproduction in Sagitta elegans in the Bay of Fundy and the Gulf of St. Lawrence. Trans. Roy. Can. Inst., 13: Part 2: 99-112. (By A. G. Huntsman and Margaret E. Reid). II
- (g) The effect of light on growth in the mussel. Trans. Roy. Soc. Can., Ser. 3, 15: Sect. 5: 23-28. III

1922. (a) Is winter mackerel fishery possible? Can. Fisherman (May, 1922), 9: (5): 88-89, 101. II ✓
- (b) Best methods of preserving nets. Can. Fisherman (Sept., 1922), 9: (9): 189-190. IV ✓
- (c) Biologists' work for the industry. Can. Fisherman (Oct., 1922), 9: (10): 230-234. II ✓
- (d) Ascidiacea. Ottawa. Rept. Can. Arctic Exped. 1913-1918 (Nov. 29, 1922), 6: Part B: 3-14. I ✓
- (e) The fishes of the Bay of Fundy. Contrs. Can. Biol. (1921): (3): 49-72. IV ✓
- (f) List of publications based on results obtained at the Biological Stations of Canada, 1901-1921. Contrs. Can. Biol. (1921): (12): 167-183. (By A. G. Huntsman and C. M. Fraser). III ✓
- (g) Results of the Hudson Bay expedition, 1920. IV. The Ascidiacea. Contrs. Can. Biol., New Ser., 1: 27-38. IV ✓
- (h) The Quill lakes of Saskatchewan and their fishery possibilities. Contrs. Can. Biol., New Ser., 1: 125-141. I ✓
- (i) The ascidian family Caesiridae. Trans. Roy. Soc. Canada, Ser. 3, 16: Sect. 5: 211-234. II ✓
1923. (a) Foretelling the fishery. Can. Fisherman (Jan., 1923), 10: (1): 6. I ✓
- (b) Research in the fisheries. Can. Fisherman (Mar., 1923), 10: (3): 75-77. IV ✓
- (c) Impressions of research conference. Can. Fisherman (Mar., 1923), 10: (3): 78. IV ✓
- (d) The Biological Board of Canada and its work. Toronto (Apr., 1923). An address delivered to the Research Conference called by the Canadian Manufacturers' Association at Ottawa (Feb. 20-22, 1923): 1-8. II ✓
- (e) The Biological Board of Canada. Fisheries research work. Toronto (Apr., 1923). An address delivered to the Research Conference called by the IV ✓

1923. (e) Canadian Manufacturers' Association at Ottawa  
(Feb. 20-22, 1923): 1-6. *"Fisheries Research Work in Canada"*
- (f) Natural lobster breeding. Canada, Biol. Bd.,  
Bull. No. 5 (July, 1923): 1-11. I
- (g) The genera of simple ascidians of Savigny and  
Fleming, with remarks on nomenclature. Trans.  
Roy. Can. Inst. (Sept., 1923), 14: Part 2: (32):  
197-205. II
- (h) The influence of tidal oscillations on vertical  
circulation in estuaries. Trans. Roy. Soc. Can.,  
Ser. 3, 17: Sect. 5: 11-14. I
- (i) The importance of tidal and other oscillations in  
oceanic circulation. Trans. Roy. Soc. Can., Ser.  
3, 17: Sect. 5: 15-20. I
1924. (a) Carbon dioxide as fish refrigerant. Can. Fisher-  
man (May, 1924), 11: (5): 117-118. IV
- (b) Migrations of mackerel. Can. Fisherman (May,  
1924), 11: (5): 120. IV
- (c) Circulation and pollution of water in and near  
Halifax harbour. Contrs. Can. Biol., New Ser.,  
2: (3): 69-79. 2 figs. IV
- (d) Limiting factors for marine animals. 1. The  
lethal effect of sunlight. Contrs. Can. Biol.,  
New Ser., 2: (4): 81-88. IV
- (e) Limiting factors for marine animals. 2. Resist-  
ance of larval lobsters to extremes in tempera-  
ture. Contrs. Can. Biol., New Ser., 2: (5):  
89-93. IV
- (f) Limiting factors for marine animals. 3. Relat-  
ive resistance to high temperatures. Contrs.  
Can. Biol., New Ser., 2: (6): 95-114. (By A. G.  
Huntsman and M. I. Sparks). IV
- (g) Oceanography. Toronto. Handbook of the British  
Association for the Advancement of Science: 274-  
290. IV
1925. (a) The ocean around Newfoundland. Can. Fisherman  
(Jan., 1925), 12: (1): 5-8. II
- (b) Work of Atlantic Experimental Station for fisher-  
IV

1925. (b) ies. Can. Fisherman (Aug., 1925), 12: (8): 255-257.
- (c) The development of the maritime fisheries. Can. Fisherman (Sept., 1925), 12: (9): 293-294. IV
- (d) The preparation of dried fish. Can. Fisherman (Dec., 1925), 12: (12): 375-378. IV
1926. (a) Fish culture in fresh waters. Union Nova Scotia Municipalities, Proc. 21st Ann. Convention: 104-106. IV
- (b) The causation of diatom maxima. Trans. Roy. Soc. Can., Ser. 3, 20: Sect. 5: 119-125. (By Viola M. Davidson and A. G. Huntsman). II ✓
- (c) The comparative thanatology of marine animals. Trans. Roy. Soc. Can., Ser. 3, 20: Sect. 5: 187-208. I ✓
1927. (a) Will science revolutionize our fisheries? Can. Fisherman (Feb., 1927), 14: (2): 39, 40, 62. IV
- (b) The oceanography of the Canadian Atlantic. National Res. Council, Bull. No. 61 (July 1927): 204-206. III
- (c) Fresh and frozen fish. Can. Fisherman (July, 1927), 14: (7): 209-210. IV
- (d) Methods of handling fish. 1. The processing of fish. Canada, Biol. Bd., Bull. No. 9: 1-16. IV
- (e) Fluctuations in the haddock fishery of the Bay of Fundy. Contrs. Can. Biol. and Fish., New Ser., 3: (18): 425-436. (By A. G. Huntsman and A. W. H. Needler). II ✓
- (f) The Passamaquoddy Bay power project and its effect on the fisheries. Saint John. The Telegraph-Journal. II
1928. (a) The oceanic problem. Collecting Net (Aug. 11, 1928), 3: (5): 1-2. IV
1929. (a) The Biological Board of Canada. Canadian Forum (Mar., 1929), 9: (102): 201-203. IV
- (b) Frozen fish the freshest. Canada, Civil Service Inst., Bull., 8: (5): 12-16. III ✓

### Biographical Sketch

Archibald Gowanlock Huntsman was born in Tintern, Ontario, on 23 November 1883 and died at his summer residence in St. Andrew's, New Brunswick on 8 August 1973.

Huntsman received a BA from University College at the University of Toronto in 1905 and an MB in 1907, having entered the new program in biological physical sciences which combined courses in arts and medicine. After his fourth year in 1904, he was taken on as a class assistant by Professor B.A. Bensley and spent his summers at the Georgian Bay Biological Station at Go Home Bay, where he studied the development of young bass and which gave him a good grounding in biological research.

Huntsman's first academic appointment was lecturer in biology at the University of Toronto in 1907. He spent the summers of 1908 and 1909 at the new Pacific Biological Station in Nanaimo and rose to be professor of marine biology (without salary) in 1927, with students both in biology and botany.

In 1911 the Biological Board of Canada, with A. B. Macallum as its secretary and supported by Ramsay Wright, appointed him curator and in 1919 director of the Atlantic Biological Station in St. Andrew's, New Brunswick, where he spent his summers. In addition, he started between 1924 and 1928 the first of the Board's technological stations for research on fish handling at Halifax. In 1934 he was appointed editor and consulting director by the Board ["kicked upstairs" as he put it in an oral history interview, but the Board "gave me the ability to do...any research I wished and all the facilities I asked for straight through for...20 years"<sup>1</sup>], retiring from the former position in 1948 and from the latter in 1953.

"Huntsman felt the need of trying to solve the problem with which fishermen must deal: What fish will be where, and when? This could typify the general problem of what life there will be at any particular place and time, taking into account all the complexities of the organism and its environment...At the Georgian Bay, Pacific and Atlantic stations, 'he ignored traditional ideas – for example, Aristotle's teleology and Darwin's principle of the survival of the fittest – in studying kinds of plants and animals...That the distribution of plants and animals is correlated with physical factors became clear to him when he was associated with Johan Hjort of Norway in the Canadian Fisheries Expedition of 1914-1915, an oceanographic survey in which the Gulf Stream..., the Labrador Current...and the St. Lawrence River...play prominent roles. It seemed obvious to him that each kind was limited in distribution and abundance by its environment. Fitness of the environment rather than the individual, Huntsman concluded, was the key factor in ecology."<sup>2</sup>

---

<sup>1</sup> UTA, B1974-0021, Oral history interview with Elizabeth Wilson, 3 May 1973, 40-41

<sup>2</sup> This biographical sketch is adapted largely from the one by Huntsman himself that appeared in *McGraw-Hill Modern Men of Science* in 1966 [see B2005-0005-/021(13)]. The portions of the text that appear in quotation marks are from this sketch unless otherwise noted.

### **Biographical Sketch** (continued)

Hjort also introduced Huntsman to a process of quick freezing fish that had been developed in Norway. During World War I, with the encouragement of J.J.R. Macleod, Huntsman worked on adapting it at St. Andrew's. One of the projects at the Halifax station was to perfect the process of handling frozen fish which was then marketed through a private company before the project met other commercial opposition and foundered.

"In 1934 Huntsman began an extended study of the behaviour of the salmon (*Salmo salar*). Those of the Margaree River of Cape Breton Island were causing most concern by not entering the river to become available for angling...Through the years, Huntsman studied other salmon populations living under varied conditions and verifying his inferences as to factors affecting salmon behaviour in laboratory and pond experiments. He came to see that the entrance of salmon into the Margaree River was dependent upon their being concentrated toward the estuary mouth by the hydrodynamic circulation set up by the mixture there of much freshet water with sea water, and through rheotactic guidance of fish through the shallow four-mile estuary by such freshet water. Also, he obtained experimental proof in the Moser River for the inference that salmon ascended with the decline of sharp freshets. The chief variables to which they responded were changes in light, temperature, current, salinity, and character of solutes...Only such complex environmental action accounts for where salmon are found to go in migrating, and it should replace the traditional fixed idea (lacking factual support) that they direct their courses first oceanward and then riverward. This elucidation of the role played by environment has broad implications for life in general, including that of man."

Huntsman became a fellow of the Royal Society of Canada in 1917 and its president for 1938. He received the Society's Flavelle Medal in 1952. In 1969 he received an LLD from the University of Toronto, and in 1978 the Department's resource centre in the Ramsay Wright Zoological Laboratories was designated the A. G. Huntsman Aquatic Biology Reference Centre in his honour. In 1968, several eastern Canadian universities combined to establish the Huntsman Marine Laboratory at St. Andrew's for the training of students in marine biology. It officially opened in 1970.

Huntsman had an insatiable curiosity and loved a good argument, as noted by his fellow students at the University of Toronto – "Though vanquished, he would argue still." These traits were reflected in his writings which ranged from purely scientific treatises to philosophical musings. His publications included over 200 articles, numerous reports for the Biological Board of Canada and other scientific bodies, and a book. The number of published pieces declined after his retirement, his principal work from this period being *Life and the Universe* (1959) which was, a reviewer noted, 'an attempt to develop a new, simplified approach to an age-old question.'

### Scope and content

This accession consists of diaries, diplomas, research files (including fish scales), memoranda, minutes, notes, reports, photographs and, especially, correspondence, manuscripts and publications documenting Dr. Huntsman's career as a marine biologist and an expert on the behaviour of Atlantic salmon (*Salmo salar*). The correspondence is primarily professional, centres on officials at the Biological (later Fisheries Research) Board of Canada, and colleagues (especially Thomas Goudge) at the University of Toronto and elsewhere, including Ralph W. Burhoe of the Institute on Religion in the Age of Science. There are files on numerous conferences, organizations such as the Ontario advisory committees on Lake Erie and Lake Huron fisheries, the Wood's Hole Oceanographic Institution, the Royal Society of Canada and the Royal Lunch Club at the University of Toronto. Dr. Huntsman's writings are primarily from his post-retirement years and centre on issues relating to fisheries research, especially the movement of salmon, and critiques of evolution.

**Access:** Open

Other accessions in this *fonds*:

B1972-0012, B1978-0010, B1982-0017, and B1988-0015. A related accession is B1974-0021.

### **Series 1: Personal and family**

Textual      1909-1978      0.18 m.

This series consists of material relating to Dr. Huntsman's personal life, including that of his immediate family. It begins with biographical information and files on the Huntsman family history and family reunions. There is a small amount of correspondence (along with some memorabilia) by and with family members but rather more, along with notes and memos, relating primarily to Huntsman's properties in Toronto and St. Andrew's, New Brunswick, and to the estate of his brother-in-law, Edward Hurbert Stirling. Only one diary is present, that for 1948, along with sporadic accounts of later activities and a daybook for 1961-1962. There are also files on Dr. Huntsman's two honorary degrees from Memorial University (1967) and the University of Toronto (1969). Huntsman's involvement with the Bloor Street United Church and its Bloor Street Parliament and United Nations Group is well documented. The series ends with files on his death and his estate.

The arrangement of the files generally follows the description given above.

Box 001

Box 002 (01) – (05)

### **Series 2: Correspondence**

Textual      1903-1973      0.85 m.

The correspondence in this series is almost completely of a professional nature. It is divided into two sections, general correspondence from 1903 to 1921, and correspondence filed by author from 1924 to 1973. In the latter category, the correspondence is concentrated in two time periods, from 1924 to 1938 and after 1949. Most of the letters in the latter period were written between the late 1950s and Dr. Huntsman's death in 1973.

The correspondence from the mid-1920s to the mid-1930s is primarily between Dr. Huntsman and current and former colleagues at the University of Toronto and other universities, with whom he shared research interests, and, especially, with officials at the Biological Board of Canada. Amongst the former were Sir William B. Hardy of Cambridge University; Henry Bigelow, first director of the Wood's Hole Oceanographic Institution; Spencer M. Lyle, president of the University of Washington at Seattle; A. B. Macallum, head of the National Research Council; J. J. R. Macleod and

1896-1978

### Series 2: Correspondence

R. H. M'Gonigle of the University of Toronto, and A. Handfield Whitman, a businessman in Halifax. Huntsman's extensive correspondence with officials of and colleagues from the Biological Board of Canada (especially A. T. Cameron, W. A. Clemens, J. J. Cowie, A. P. Knight and J. Playfair McMurrich) and the federal Department of Fisheries sheds light on issues surrounding research projects and staffing, including his own position as director of the Atlantic Biological Station.

The remaining correspondence in this series deals primarily with Dr. Huntsman's scientific research and other intellectual pursuits in the last years before his retirement and, especially, during the last twenty years of his life. Then free of most administrative duties, he turned his insatiable curiosity to a wide variety of scientific and philosophical topics, about which he bombarded his friends and colleagues with letters and memoranda. Included in this outpouring of ideas was his son-in-law, Colin Mawson, who was a professional biologist.

His correspondents included academics from the University of Toronto in his own field, such as Donald Chant, F. E. J. Fry, but also astronomer Helen Hogg, professors of religion such as Derwen Owen and, especially, philosopher Thomas Gouge. Other frequent correspondents ranged from zoologist William S. Hoar of the University of British Columbia to Philipp Wolf of the Swedish Salmon and Trout Association. The most prolific of all was Ralph W. Burhoe of the Institute on Religion in the Age of Science, with which Huntsman was deeply involved in the 1950s, and the American Academy of Arts and Science. He also kept up a spirited correspondence with officials of the Fisheries Research Board of Canada, including R. O. Brinkhurst, Paul f. Elson, Harry Hachey, J. C. Medcof, and Noel Tibbo. He also corresponded regularly with former classmates, including Charles Heyd and James G. McKay; the latter waxed eloquently about the virtues of Social Credit with the fervour of a recent convert.

For a listing of the correspondents, see Appendix 1.

See also Series 6 and 7 for additional correspondence with many of the individuals listed in the Appendix.

### **Series 3: Education**

Textual      1896-1973      0.11 m.

This series documents part of Dr. Huntsman's education, including surviving remnants of courses he took for his Bachelor of Arts at the University of Toronto (1901-1905), his Bachelor of Medicine (1905-1907) and subsequent courses (he had hoped to take a PhD but never managed it). Included are correspondence, term papers, examination questions, and a few items of memorabilia.

Most of the series is composed of correspondence and related material associated with Dr. Huntsman's involvement with reunions of the Class of 1905 (University College), the University of Toronto Medical Alumni Association, and the Alpha Omega Alpha Honour Medical Society. One of his principal correspondents was Charles Gordon Heyd, president of the Class of 1905 for many years, for whom there is a separate correspondence file in Series 2.

The arrangement is by academic programs and alumni associations and chronologically within each.

For further information on the 'Class of 1905', see B1982-1079.

Box 006 (25) – (38)

Box 007 (01) –(11)

### **Series 4: University of Toronto – Administration**

Textual      1907-1973      0.08 m.

Except for a notebook on Dr. Huntsman's early years as a lecturer at the University of Toronto and general correspondence relating to his employment there for the years 1907 to 1949, this series consists entirely of files relating to his activities at the University following his retirement in 1953.

There is some general correspondence but the files relate largely to specific activities and events. The most notable are the course in basic biology-ectology that emerged in 1973, the opening ceremonies of the Ramsay Wright Zoological Laboratories in 1965, Dr. Huntsman's discussion group within the Department of Zoology (1968-1969) and the Royal Lunch Club (1961-1973). Dr. Huntsman founded the last group, an informal gathering of senior academics who discussed ideas of mutual interest over lunch.

Further files relating to this series may be found in accessions B1978-0010 and B1982-0017 in this *fonds*.

### **Series 5: Research and ideas**

Textual, artifacts

1926-1973

0.10 m.

Except for some research data assembled in the 1920s and the 1930s, this series consists of research that Dr. Huntsman carried out after his retirement. The focus is on Atlantic salmon, especially in the Shubenacadie estuary area, the Margaree River, and the Magaguadavic River, a research project he was working on at the time of his death (it includes packets of fish scales). There are also questionnaires on 'science: reaction to facts' (1965) and salmon migration (1972), and a memorandum on fishery science (1972).

The arrangement in this series is primarily chronological. See also accessions B1978-0010 and B1988-0015 in this *fonds*.

Box 008 (01) – (13)

### **Series 6: Fisheries Research Board of Canada**

Textual

1946-1973

0.14 m.

This series consists of correspondence, memoranda, notes and reports relating to Dr. Huntsman's association with the Fisheries Research Board of Canada as consulting director of the Board and, after his retirement, as the "historical conscience" of the Board and a critical observer of its scientific methodology.

The series begins with a number of undated memoranda and notes (post-1949) along with a 1950 memorandum on the scientific research being carried out by the Board's biological stations. These are followed by correspondence with Board officials covering the years 1955-1973. There is also a file of correspondence and drafts of sections associated with Harry B. Hachey's *History of the Fisheries Research Board of Canada* (1965). The series concludes with mimeographed copies of Atlantic salmon and trout investigations for the years 1945-1953, written primarily by Huntsman, along with a copy of his final report as consulting director. These reports are complemented by the correspondence in this series and that in Series 3, and by the drafts of manuscripts and covering correspondence found in Series 9.

Further records relating to the Fisheries Research Board and its predecessor, the Biological Board of Canada, are found in accessions B1978-0010, B1979-0048, and B1988-0015 in this *fonds*.

1896-1978

### **Series 7: Professional activities and organizations**

Textual      1921-1973      0.71 m.

Dr. Huntsman's association with professional organizations covered some seventy years, and he continued to be active in a number of them up to his death. The files in this series concentrate on those organizations he was involved with after his retirement, although there are a few that predate 1953. Included is correspondence, memoranda, notes, drafts of articles and reports, minutes of meetings, and a few photographs. The arrangement is alphabetical by name of the organization or conference.

The most extensive files relate to the Conference [[later Institute] on Religion in the Age of Science, with which Huntsman was deeply involved in the 1950s and through which, with Ralph Burhoe and others, he carried on a spirited correspondence on the meaning of life and the existence of mankind. There is also a substantial amount of material documenting Dr. Huntsman's involvement with the Ontario Department of Lands and Forests' advisory committees on the Lake Erie and Lake Huron fisheries, both of which he chaired from 1964-1967. His life long interest in Atlantic salmon is detailed in a number of projects, including the International Passamaquoddy Fisheries Commission that reported in 1934, the International Joint Commission on the Passamaquoddy Tidal Power Project (1960), the International Atlantic Salmon Foundation, an international conference on Atlantic salmon in St. Andrew's, New Brunswick, in 1972, and his involvement with the Wood's Hole Oceanographic Institution. The last twenty-five years of his association with the Royal Society of Canada are well documented, and there is smaller amount of material on professional groups like the American Eugenics Society, the American Fisheries Society, and the Canadian Society of Zoologists. These and other professional associations are also documented in other accessions in this fonds, especially B1978-0010.

For a listing of the material in this series, see Appendix 2.

Further records relating to professional associations in this *fonds* may be found in accessions B1978-0010, B1979-0048 and B1988-0015.

1896-1978

### **Series 8: Manuscripts and publications**

Textual      1910-1973      1.95 m.

Dr. Huntsman was a prolific writer of articles and reports; over two hundred appear in his curriculum vitae (See B2005-0006/014(14)). This document, however, takes him only up to 1953, the year of his retirement and does not include many of the reports he wrote for the Biological Board of Canada/Fisheries Research Board of Canada. After his retirement, Dr. Huntsman still had nineteen years of prodigious output, only a very small portion of which was published. Dr. Huntsman was recognized by his colleagues to be both a scientist and a philosopher, with the latter gaining significance as the years passed. He continued to push his ideas on fisheries research, especially the movement of salmon, but wrote more about issues relating to 'life' and became increasingly critical of evolution. In his 1959 book, *Life and the Universe*, Dr. Huntsman attempted to synthesize his ideas about man's place in the universe.

The bulk of the drafts of Dr. Huntsman's scientific writings prior to his retirement are found in accessions B1972-0012, B1978-0010, and B1979-0048, but especially in B1978-0010. For the post-retirement years, a researcher should concentrate on the files in B2005-0006.

The arrangement of the files in this series is chronological. For a file listing, see Appendix 3.

Additional correspondence relating to Dr. Huntsman's writings is found in Series 2, 6 and 7.

### **Series 9: Addresses**

Textual      194- - 197-      0.04 m.

While Dr. Huntsman gave a large number of addresses over his lifetime, only a few of them are represented in this series and all are post-retirement (the first file in the series consists of general correspondence regarding addresses). The arrangement is chronological.

For a listing of the addresses, see Appendix 4.

For additional addresses, see accessions B1978-0010 and B1979-0048.

### **Series 10: Photographs**

[192-] - 1972

0.07 m

A group portrait and less formal shots document professional meetings attended by Dr. Huntsman, including the Herring Symposium at St. Andrew's Biological Station, 1958; Mount Allison Summer Institute, 1960; a meeting of the Ontario Society of Biologists, 1964; Wood's Hole Oceanographic Institution meetings, 1960s-1972. There are also some early photographs of the Biological Station at St. Andrew's, New Brunswick in 1920s as well as one glass slide showing young Prof Huntsman working in a lab, n.d. Photographs are arranged chronologically.

/Box (file)	Title	Dates
/014 (14)	Huntsman's publications – lists (to 1953)	1953
(15)	Requests for copies of publications and permission to cite	1962-1972
(16)	Book reviews	? – 1972
(17)	'Cause and effect'. Draft	1910?
(18)	'Fisheries research in the Gulf of St. Lawrence in 1917,' <i>Canadian Fisherman</i> , 5, 5 (May 1918) 740-744. Offprint	1918
	'Our eastern flat-fish,' <i>Canadian Fisherman</i> , 5, 6 (June 1918) 788-790	1918
(19)	'Where live the lobsters of the Gulf?', <i>The Beacon</i> (St. Andrew's, New Brunswick), XXX, 19 (9 November 1918) 6	1918
(20)	'Lakes and fishes,' <i>Canadian Fisherman</i> , 6, 5 (May 1919) 148-152	1919
	'The growth of fishes,' <i>Transactions of the American Fisheries Society</i> , XLIX, 1 (December 1919) 10-23. Offprint	1919
(21)	'Is winter mackerel fishing possible?' <i>Canadian Fisherman</i> , 9, 5 (May 1922) 88-89, 101	1922
	'Biologists' work for the industry,' <i>Canadian Fisherman</i> , 9, 10 (October 1922) 230-234	1922
(22)	'Foretelling the fishery,' <i>Canadian Fisherman</i> , 10, 1 (January 1923) 6	1923
(23)	'The Biological Board of Canada and its work.' From an address delivered to the Research Conference called by the Canadian Manufacturers' Association at Ottawa, 20 February 1923	1923
(24)	'The ocean around Newfoundland,' <i>Canadian Fisherman</i> , 12, 1 (January 1925) 5-8. Typescript, offprint, pamphlet	1925
(25)	'The oceanic problem,' <i>The Collecting Net</i> , 3, 5 (11 August 1928) 1-2	1928
/027 (03)	'An open letter to A. R. Dauphinee,' <i>Halifax Daily Star</i> , 28 March 1929, with response and editorial comment. The discussion was on frozen fish fillets	1929
/014 (26)	'The work of the Biological Board,' <i>Canadian Chemistry and Metallurgy</i> , 14, 10 (284) (October 1930) 21	1930
(27)	'Fishery resources of the Fundy area'. Typescript	1933?
/015 (01)	'River discharge has influence on sardine movement...,' <i>Fundy Fisherman</i> , 6, 12 (21 November 1934) 1, 10	1934
(02)	'What people and how many? Draft	1937?
(03)	'The problem of life'. Partial draft	1938?

/Box (file)	Title	Dates
/015 (04)	'The Passamaquoddy problem of fisheries versus power'. Draft	1939?
(05)	'Scientific method.' Draft	[193-?]
(06)	'Fisheries research in Canada'. Drafts	[194-?]
(07)	'Production of life in estuaries'. Typescript	[194-]
(08)	'Illustrations regarding solutions of complex practical problems'. Draft	1940?
(09)	'The Pomquet River and hypertheutia (too many fishermen).' Draft	1940?
(10)	'Salmon refuse to rise; science finds out why,' <i>Halifax Herald</i> , 6 March 1940, 1	1940
(11)	'Salmon and trout research,' <i>Telegraph-Journal</i> [Saint John, N.B], 4 March 1940, 4	1940
(12)	'Effects of capture and tagging on fish behaviour'. Draft	[194-?]
(13)	'Effects of intense fishing for Fundy small herring'. Draft	[194-]
(14)	'Fishery research'. Notes and fragments of pieces	1940s
(15)	'Winter herring'. Draft	[194-]
(16)	'Efforts to transplant Pacific salmon have all failed,' <i>Commercial Fishermen's Weekly</i> , 8, 21 (22 May 1942), 249. Report on Huntsman's comments	1942
(17)	'Breeding and immigration vs. climate and resources in Canada'. Draft	[1943?]
(18)	'Miramichi fisheries investigation 1918.' Notes; offprint from the <i>Commercial and the World</i> (Chatham, NB), 18 and 25 January, 1 and 8 February 1945)	1945
(19)	'The mechanism for producing Passamaquoddy herring'. Drafts	1945?
(20)	'Fisheries oceanography'. Draft	1946?
(21)	'The basis of life'. Drafts	1947?
(22)	'Fish migration'; 'Migration'; 'The problem of fish populations'. Notes, drafts	1947-1949
(23)	'Freewill, determination and chance'. Drafts, correspondence	1947-1948
(24)	'Nature versus nurture'. Draft	1947?
(25)	'Scientific thinking and society'. Drafts (possibly associated with 'The basis of life') of 25 sections, ranging from 'Abstraction' and 'Knowledge' to 'Reality' and 'The World and the World'.	1947?-1949?
(26)	Short pieces on the universe, knowledge, etc.	1947?
(27)	'Climate and fish from Canada to Newfoundland'. Draft	1948?
(28)	'The physical world and relativity'. Draft, notes	1948?

## Appendix 3: Series 8 Manuscripts and publications (cont'd)

/Box (file)	Title	Dates
/021 (04)	'Myth in the movement of salmon'; 'The myth of salmon migration'. Drafts of several versions, correspondence	1965-1969
(05)	'Salmon dynamics'. Draft	1965?
(06)	Salmon migration and fisheries management. Notes, drafts	1965?-1971?
(07)	'Scientifics'. Drafts of three different papers	1965?
(08)	'Unity of life'. Drafts, notes	1965?-1967?
(09)	'Canada as a melting pot'. Drafts, notes	1966?
(10)	'Fishery production by river estuaries'; 'Variety in Canadian estuaries and production of life'. Drafts	1966?
(11)	'Fishery research for definite objectives'. Drafts	1966?
(12)	'Getting new knowledge, scientific discovery or scientifics'. Draft	1966?
(13)	'Huntsman, Archibald Gowanlock, Canadian biologist,' in <i>McGraw-Hill modern men of science ; 426 leading contemporary scientists, presented by the editors of the McGraw-Hill encyclopedia of science and technology</i> . New York: McGraw-Hill, 1966. Correspondence, drafts	1965
(14)	'Is Darwinism scientific?' Notes, drafts of several versions	1966-1967
(15)	'Life'. Drafts of several pieces	1966?-1969?
(16)	'Possible return in wandering'. Draft	1966?
(17)	'Purpose'. Draft, note	1966?
(18)	'Rapid scientific advance for practical use'. Drafts	1966
(19)	'Residual currents'. Draft	1966?
(20)	'Salmon for angling'. Drafts, correspondence	1966
(21)	'Salmon migration: the role of the scientific naturalist.' Drafts of several versions	1966
(22)	'Science and religion'. Drafts (1966), correspondence	1966-1969
(23)	<i>Science and scientific advance</i> [proposed book]. Notes, drafts of several versions, with correspondence and commentary by U of T professors, especially Thomas Goudge. Includes notes and short pieces on "scientifics" and related ideas and concepts.	1966
(24)	<i>Science and scientific advance</i> [proposed book]. Later (?) drafts; paper on 'Science and scientifics – reinstating Bacon'.	1966
(25)	<i>Science and scientific advance</i> [proposed book]. Correspondence with students	1966
(26)	<i>Science and scientific advance</i> [proposed book]. Correspondence with U of T Press	1966

## Appendix 3: Series 8 Manuscripts and publications (cont'd)

/Box (file)	Title	Dates
/022 (01)	'Scientific advance'. Drafts, correspondence	1966
(02)	'Scientifics'. Several short pieces	1966?-1969?
(03)	'Scientifics'. Draft with sections A1 to E1	1966?
(04)	'Scientifics – discovering how salmon migrate'. Draft of two different versions	1966?
(05)	'Scientifics – the adventure of waking life'. Draft	1966?
(06)	'Supreme object'. Draft	1966?
(07)	'Transport of fish and diurnal vertical migration'. Drafts	1966?
(08)	'The true origins of organisms'. Drafts, correspondence	1966-1970
(09)	'What organisms?'. Drafts	1966?
(10)	'Being and knowing'. Draft	1967?
(11)	'Bringing salmon back'. Drafts	1967?
(12)	'Discovering how salmon migrate'. Drafts of two different papers, with covering correspondence	1967
(13)	'Discovery'. Two pieces on this theme. Drafts	1967?
(14)	'A dream realized at long last' [reflections on AGH's marriage]. Draft	1967
(15)	'Full use of knowledge about being, knowing and communicating'. Draft	1967?
(16)	'How salmon migrate'. Drafts of several versions; notes on salmon migration	1967?
(17)	'How salmon migrate: a new approach'. Drafts, correspondence	1967-1968
(18)	'Knowledge and science'. Drafts	1967?
(19)	'Knowledge – the verdict of science'. Drafts	1967?
(20)	'"Natural selection" and the population problem.' Draft, note	1967
(21)	'Ontology'. Drafts of several pieces on this topic	1967?-1971?
(22)	'Origin of man'. Drafts	1967?
(23)	'The population problem'. Drafts of two versions	1967?
(24)	'The population problem – discarding Darwinism'. Draft	1967?
(25)	'The population problem: is Darwinism scientific?' . Drafts of two versions, correspondence	1967
(26)	'Scientific outlook on life'. Drafts, correspondence	1967
(27)	'Sea culture – The Passamaquoddy vision'. Drafts	1967?
(28)	'Surplus salmon.' Note, drafts of two pieces	1967?
(29)	'The University of Toronto. Department of Zoology'. Drafts of his reminiscences for and correspondence with E. Horne Craigie for his <i>A history of the Department of Zoology of the University of Toronto up to 1962</i> .	1967

## Appendix 4: Series 9 Addresses

/Box (file)	Title	Dates
/026 (09)	Addresses. Correspondence re	1961
(10)	Address on Samuel Wilmot	194-?
(11)	'The men in the Universe'. Address to the Trident Society, 24 March 1955	1955
(12)	'Canada's future.' Address to an unnamed society	1956
(13)	'Reflections on science.'	1957
(14)	'The Maine circulation with no migration of animals'. Drafts of notes for address with illustrative slide show	[196-?]
(15)	Fisheries Council of Canada. Panel discussion, 11 April 1961	1961
(16)	'Animal migration.' Address to 17th the International Congress of Zoology, 22 August 1963	1963
(17)	'Ecology vs Darwinism'. Paper given at Woods Hole, June 1965. Drafts	1965
(18)	'Scientific advance in fisheries.' Seminar, 5 October 1965	1965
(19)	'Salmon migration'.	1969
(20)	Untitled address	[197-?]
(21)	'Environmental quality in our future'. Address to the University of Guelph Biological Society, 20 January 1970. Drafts, correspondence	1970
(22)	'Toward a heavenly world: a 'sermon' delivered to the Wesley United Church, St. Andrew's, NB, 27 September 1970.' Privately printed	1970
(23)	'Unique Passamaquoddy'. Drafts	197-
