Biographical note

Ernest Armstrong McCulloch was born in Toronto on April 27, 1926 and attended the University of Toronto where he graduated with honours with an MD in 1948. When he was awarded the Ellen Mickle Fellowship and the Chappell Prize in Medicine he studied for a year at the Lister Institute in London England. On his return to Canada he interned at the Toronto General Hospital from 1949 to 1952 and was assistant resident at Sunnybrook Hospital during 1952-1953.

In 1954 he joined the University of Toronto's Department of Medicine as a clinical teacher. By 1957 he was Head, Subdivision of Hematology, Division of Biological Research at the Ontario Cancer Institute in Toronto. He was appointed Assistant Professor in the Department of Medical Biophysics in 1959 and Associate professor in 1964. He was appointed full professor in 1966 in the Department of Medical Biophysics and in 1970 became professor in the Department of Medicine.

By the 1970s he was involved in administrative activities within the University and at other research organizations. He held various positions during this period such as Graduate Secretary at the Institute of Medical Science and later was Director of the Institute (1975-1979). From 1979 to 1982 he was Assistant Dean, School of Graduate Studies. In other areas, he held positions on University committees such as Human Subjects Review Committee, Research Board and Decanal Promotions Committee of Faculty of Medicine and Faculty of Arts and Science (1975-ca 1986).

Dr. McCulloch's expertise was also sought by government and other organizations at the provincial and national levels. From 1958 on he held positions with The Banting Research Foundation, the Medical Research Council (MRC), the Royal Society of Canada, and the National Cancer Institute of Canada, to name just a few. On the international scene, Dr. McCulloch was actively involved from 1972 to 1991 in such organizations as the National Blood Club (USA), the American Society of Hematology and the Leukemia Society of America. He also was a member of editorial boards of scholarly journals such as *Journal of Cellular Physiology*, *Blood*, *Clinical Immunology and Immunopathology*, and *Cancer Surveys*

Dr. McCulloch's career has been focused primarily on medical research centred at the Ontario Cancer Institute. Dr. McCulloch is widely known for his pioneering research in stem cells. In the early 1960's Dr. McCulloch with his colleague, Dr. J.E. Till "created the first quantitative, clonal method to identify stem cells and used this technique for pioneering studies on stem cells. In addition to providing detailed information about blood cell development, they established the concept of stem cells and set the

framework in which stem cells are studied today."¹ In 1969 their work was recognized with the Gairdner Foundation International Award.

During his career, Dr. McCulloch has been recognized frequently for his academic and research accomplishments. In addition to the Gairdner Award in 1969, Dr. McCulloch has been elected a Fellow of the Royal Society of Canada (1974), and received the Silver Jubilee Medal (1977). On his retirement in 1982, he was made University Professor. In 1988 Dr. McCulloch became an Officer of the Order of Canada. In 1999 he was elected a member of the Royal Society. In June 2004 he was awarded an honorary degree from the University of Toronto and in September he was officially inducted into the Canadian Medical Hall of Fame. On 23 September 2005 he and Dr. Till were recipients of the Lasker Award for basic medical research. In 2009, both McCulloch and Till were nominated jointly for the Nobel Prize for Medicine and Physiology for their work relating to stem cells. The prize was awarded instead to another group for the discovery of how chromosomes are protected by telomeres and the enzyme telomerase.

Dr. McCulloch is currently Senior Scientist Emeritus, Division of Cellular Molecular Biology at the Ontario Cancer Institute, working on research relating to the growth of malignant blast stem cells.

Scope and content

Date range: 1952-2005

Extent: 21.97 m (boxes) of textual and graphic materials

This finding aid has been compiled from inventories of the four accessions prepared by Harold Averill and Garron Wells. The fonds describes the personal records of Dr. Ernest McCulloch documenting his career as professor of medicine and administrator at the University of Toronto, and as medical researcher and author of over 200 articles mainly relating to his work on leukaemia and other blood related disorders. Arranged in 17 series, this fonds contains professional and personal correspondence, files relating to administrative activities at the University of Toronto and the Ontario Cancer Institute/Princess Margaret Hospital, subject files on external activities with various professional and academic organizations, editorial boards, etc., teaching materials including lecture notes and extensive research materials documenting experiments relating to cell growth in mice conducted during the 1960's. Also included are graphic materials documenting activities such as meetings and awards as well as illustrations for presentations and publications.

Related accessions: B1991-0004, B1993-0016, B1995-0035, B1998-0012, B2005-0007

Series 1: Personal

Date range: 1951-2004

Extent: 2.58 m (12 boxes) of textual and graphic material

Scope and content: This series includes records documenting personal family life, professional activities including position appointments, medical internship, club memberships, and participation in health related organizations at the national and international level, and honours bestowed. Amongst the last are the Gairdner Foundation International Award (1969), election to the Royal Society (1999), an honorary degree from the University of Toronto and election to the Canadian Medical Hall of Fame (both 2004).

Includes weekly appointment books, daily journals, curriculum vitae, personal and professional correspondence, minutes of meetings, certificates, and photographs.

Note: Photoprint of Dr. McCulloch removed from (03) to B2005-0007/P

Access: The following files are restricted: B1998-0012/002(20) and (21)

Boxes: B1991-0004/001 – /006 (12)
B1998-0012 /001 (01) – (09)
B1998-0012/002 (20) & (21) **Restricted**

B2005-0007/001(01) – (04)
B2005-0007/P

Series 2: Professional Organizations – personal

Date range: 1963-2003

Extent: 0.87 m (4 boxes) of textual and graphic material

Scope and content: This series contains files documenting Dr. McCulloch's participation in various organizations mainly relating to the medical field. His participation included general membership, attendance at conferences, reviewer and referee of articles for scholarly journals, committee membership, among other activities. Among the organizations represented in this series are American Association for Cancer Research, American Society of Hematology, Atomic Energy of Canada's Research and Development Advisory Panel, the journal *Clinics in Hematology*, Ontario Cancer Treatment and Research Foundation, Ontario Medical Association, Royal Society of Canada, Royal College of Physicians and Surgeons of Canada, the Toronto Blood Club, the Japan Prize and the Royal Society.

Note: Two photoprints of the members of the AECL Advisory Panel removed from File 06 to B1995-0035/001P(01).

Access: Open

Boxes: B1991-0004/006 (13) -/007(20)
B1995-0035/002 (06) -(11)
B2005-0007/001 (05) and (06)

Series 3: Professional organizations -general

Date range: 1972-2003

Extent: 0.89 m (3 boxes) of textual records

Scope and content: Dr. McCulloch was involved with a number of Canadian, American and other international professional organizations. This series contains files mainly dealing with his involvement with the AIDS Steering Committee of the Royal Society of Canada. Other organizations include American Association for Cancer Research, Canadian Institute of Academic Medicine, International Society for Experimental Hematology, the Japan Prize, and the Royal Society.

Files include correspondence, minutes of meetings, reports, etc.

Arrangement: Arranged alphabetically by name of professional organization.

Access: Open

Boxes: B1991-0004/014A – B1991-0004/016 (33)

Series 4: University of Toronto -personal

Date range: 1969-1985

Extent: 0.40 m (2 boxes) of textual records

Scope and content: As a member of the faculty of the University of Toronto, Dr. McCulloch regularly lectured to students in the Department and Faculty of Medicine. He also held a number of administrative appointments in the School of Graduate Studies, as well as serving on various University committees. Included in this series are records relating to his appointment as University Professor in 1982, as Assistant Dean, School of Graduate Studies, lecture notes for Courses in haematology, biology and medical ethics and other teaching materials, as well as personal correspondence with University of Toronto officials.

Note: see series 5 for related records

Access: Open

Boxes: B1991-0004/007(21) – B1991-0004/008(21)

Series 5: University of Toronto - administration

Date range: 1967-1990

Extent: 0.80 m (2 boxes) of textual records

Scope and content: This series documents Dr. McCulloch's various administrative activities as faculty member of the Faculty of Medicine and the Department of Medicine, as well as at the senior administrative with the School of Graduate Studies, Office of Research Administration, and Faculty of Arts and Science. Includes correspondence, reports, minutes of meetings and other records relating to promotions, research, dissertations, courses, etc.

Access: Open

Boxes: B1991-0004/024 (16) – B1991-0004/025 (18)

Series 6: Correspondence -general

Date range: 1958-2005

Extent: 1.90 m (7 boxes) of textual records

Scope and content: These files concentrate on the professional activities of Dr. McCulloch and his colleagues and often contain information about appointments and grant applications. Includes correspondence, curriculum vitae, occasional letters of reference, copies of research papers and offprints of articles, and miscellaneous material.

Arrangement: The files are arranged alphabetically by correspondent.

Access: Open

Boxes: B1991-0004/016 (34)-(35)
B1991-0004/017 - /019
B1993-016/005 - /006
B2005-0007/001 (07)

Series 7: Administrative files - general

Date range: 1962-1990

Extent: 0.87 m (3 boxes) of textual records

Scope and content: This series contains more files relating to Dr. McCulloch's work with various professional and scholarly organizations. Includes referee reports on fellowships and other grant applications, correspondence, minutes of meetings, etc.

Arrangement: Arranged alphabetically by title.

Access: Open

Boxes: B1991-0004/019 (23) – (34)
B1991-0004/020 (01) – (19)
B1993-0016/004

Series 8: Administrative files – “Dead files”

Date range: 1964-1983

Extent: 0.60 m (3 boxes) of textual records

Scope and content: This series contains files relating to studies and other activities for mainly government agencies of the Ontario provincial government, and the Canadian federal government as well as the National Institutes of Health in the United States. Canadian government bodies include the Department of National Defence, Department of National Health, and the National Cancer Institute of Canada, to name a few. For Ontario, files concern the Ontario Cancer Institute/Princess Margaret Hospital, and the Ontario Council of Health.

Note: See also Series 10 for additional records on the Ontario Cancer Institute.

Access: Open

Boxes: B1991-0004/020 (20) – B1991-0004/022 (04)

Series 9: Editorial Boards/ Referee for scientific journals

Date range: 1971-1995

Extent: 0.40 m (2 boxes) of textual records

Scope and content: Dr. McCulloch was a member of editorial boards at a number of scholarly journals including *Blood*, *Blood Cells*, *Journal of Cellular Physiology*, *Cancer Surveys*, among others. This series contains records documenting these activities as well as his work as a referee for other scholarly journals.

Arrangement: Arranged in alphabetical order by title of journal.

Access: Open

Boxes: B1991-0004/014 (01)-(23)
B2005-0007/001 (08)

Series 10: Ontario Cancer Institute

Date range: 1965-1991

Extent: 1.60 m (Boxes) of textual records

Scope and content: Dr. McCulloch was on staff of the Ontario Cancer Institute for most of his career. This series consists of files relating to administrative activities at the Institute. Includes correspondence, minutes of meetings for the Board and various committees, reports and other records. See also Series 14 for records relating to grant applications from OCI.

Access: Open

Boxes: B1991-0014/022 (05) – B1991-0014/024 (14)
B1993-0016/001
B1993-0016/003

Series 11: University of Texas

Date range: 1991-1993

Extent: 0.07 m (1 box) of textual records

Scope and content: Dr. McCulloch was Distinguished Professor, Division of Laboratory Medicine, M.D. Anderson Cancer Center, University of Texas in Houston from 1991 to 1993. This series consists of correspondence, minutes of the Division of Laboratory Medicine Advisory Committee, data, manuscripts and overhead transparencies relating to the study of acute myeloblastic leukemia.

Access: Open

Boxes: B1995-0035 /003 (01) to (06)

Series 12: Addresses

Date range: 1969-2000

Extent: 1.28 m (5 boxes) of textual records

Scope and content: In addition to his responsibilities as medical researcher, faculty member and author, Dr. McCulloch also was in demand as a speaker by many organizations. Among the sponsors of these talks and addresses were the CBC –TV program “The nature of things”, numerous national and international organizations for the study of cancer and haematology, Royal Society of Canada, and other universities. In the late 1980s many of this addresses dealt with AIDS research. Files in this series contain correspondence relating to the addresses given and/or drafts of the addresses themselves.

Many of those that were eventually published may be found in Series 6: Publications.

Arrangement: Arranged chronologically

Access: Open

Boxes: B1991-0004/008(22) – (47)

B1991-0004/009

B1991-0004/010 – B1991-0004/011 (19)

B2005-0007/001 (09) -(11)

Series 13: Manuscripts (unpublished)

Date range: 1957-1990

Extent: 0.27 m (2 boxes) of textual records

Scope and content: This series includes files containing correspondence, research notes and manuscripts of articles that were never published as well as some that were rejected.

Access: Open

Boxes: B1991-0004/011 (20)-(32)
B1998-0012 /002 (04)- (05)

Series 14: Publications

Date range: 1952-2003

Extent: 1.05 m (5 boxes) of textual and graphic material

Scope and content: This series consists of manuscripts, correspondence, research notes relating to published articles and chapters in books written alone or in collaboration with colleagues. Arrangement is chronologically by date of publication, although contents of file may be earlier.

See Appendix 12 for file list. The bibliographic data in this appendix has been copied directly from Dr. McCulloch's curriculum vitae and additions have been made where warranted.

Photographs of figures, viruses, etc. accompanying manuscripts removed. See Series 17
Graphic materials

Access: Open

Boxes: B1991-0004/012 – /13
B1995-0035/004
B2005-0007/001 (12) – (19)
B2005-0007/002 (01) – (02)

Series 15: Grant applications

Date range: 1965-1998

Extent: 1.94 m (9 boxes) of textual records

Scope and content: This series contains applications for funding blood related studies in various areas such as leukemia from the Medical Research Council (Canada), U.S.

National Institutes of Health and Ontario Cancer Treatment and Research Foundation. Files contain correspondence, completed applications with biographical information on investigators, outline of research project, budget etc.

Access: Open

Boxes: B1991-0004/025 (19) – (26)

B1993-0016//002

B1993-0016/007 – /009

B1995-0035/005(01) – (10)

B1998-0012/001 (10) – (12)

B1998-0012/002 (01)–(03)

B2005-0007/002 (03)

Series 16: Research

Date range: 1958-1990

Extent: 4.78 m (20 boxes) of textual and graphic material

Scope and content: This series² contains records mainly relating to experiments undertaken by Dr. McCulloch and his research team. The alpha experiments are CFU repression experiments, and the related AB experiments are very early repression studies on the definition of the phenomenon. The AB, FAB experiments conduct further studies on immunology with an emphasis on early cellular immunology, while the “current experiments 609” mark the beginning of cellular immunology experiments at the University of Toronto. The D series consists of early radiobiological experiments. Radiology and the beginnings of studies of the heterogenetic model leads to the SC model. The SC series contains Connie Eaves' studies on repression, while the SC, D and E series contains important early experiments. The VV84-129 experiments compare the culture results that lead to the development of new technology.

The DII experiments study multiple transplants and the effects of same. The F1-F45 experiments contain Edith Russell's compilations. The L1-37 experiments study the effect of endotoxins, etc. on the spontaneous growth of colonies after radiation. The N1 and N2 series contain the earliest cell culture experiments. The NA series is comprised of early cell cycle experiments and the PF experiments conduct further studies in cell separation. The PG experiments study cell separation using propylene glycol.

Note: Patient data for various papers for 1979 will be found in B1991-0004/012

² Series note compiled from information provided by Dr. McCulloch.
