James Loudon

Scope and Content

Records, textual; 1885-1916; 3.66 m.

This accession consists primarily of the professional records of James Loudon as professor and subsequently president of the University of Toronto (1892-1906) who died in 1916. Dr. Esther Loudon donated it to the University of Toronto Library in 1964.

The accession has been arranged into fifteen record series, the largest contains administrative files of the Office of the President comprised mainly of correspondence. The following is a full listing of record series:

Series 1: Office of the President. Administrative Files.
Series 2: General Correspondence.
Series 3: Correspondence Files.
Series 4: Correspondence Files.
Series 5: Office of the President. Administrative Files: Applications, Recommendations and Appointments.
Series 6: Scholarships.
Series 7: Addresses.
Series 8: Lecture Notes, Papers and Manuscripts.
Series 9: Orders in Council/ Government Legislation.
Series 10: Personal Correspondence.
Series 11: Appointment Books.
Series 12: Diplomas.
Series 13: Miscellaneous.
Series 14: File Index.
Series 15: Artifacts.

A file index, Series 14, was created by James Loudon as an aid in preparing his memoirs. The number/letter scheme appearing in the lower right hand corner (e.g. [A.1]) was added by librarians as a further aid to the arrangement of the files after their donation to the university. These have been indicated in the following record series. Later attempts at arrangement were made and abandoned by University Archives staff. This accession, to some extent, still reflects these earlier attempts at arrangement.

Access: Open.

Series 14: File Index

/021

This file comprises an index to the papers of President James Loudon (1892-1906). The cards appear to have been prepared by Loudon, probably as an aid in writing his memoirs.

The numbering scheme in the lower right corner of each card reflects an early attempt at file arrangement by librarians and not by Loudon, e.g. T.17. This scheme has been indicated in the current finding aid.
