Biographical note

Louis 'Lou' Siminovitch was a molecular biologist and professor of medicine at the University of Toronto. In 1969, he helped found the Department of Medical Cell Biology (now Molecular Genetics), serving as its first Chair from 1969 to 1972.

He was born in Montreal in 1920 to parents who had emigrated from Eastern Europe. As a student he excelled in mathematics, and won a scholarship in chemistry to McGill University. He received his undergraduate and graduate education in chemistry from McGill (PhD 1944).

After spending three years with the National Research Council's atomic energy project in Ottawa and Chalk River, he received a Royal Society Fellowship for further study at the Institut Pasteur in Paris, where he switched his interest to biology, in particular, to genetics. Dr. Siminovitch remained at the Institut Pasteur for six years, working with Drs. Lwoff, Monod, and Jacob, future Nobel Prize laureates. It was here that he began his pioneering studies on the regulation, structure and function of viruses that grow in bacteria, sharing in the discovery of bacteriophage lysogeny. This work contributed an essential building block in the understanding and treatment of cancer.

He returned to Canada in 1953 on a National Cancer Institute Fellowship at the Connaught Medical Research Laboratories in Toronto. By 1956 he was attracted to the team at the newly created Ontario Cancer Institute at the University of Toronto, dedicated to a multidisciplinary approach to cancer research. He would remain there until 1968. During this time, he also became a staff member of the Department of Medical Biophysics. In 1969, he helped found the Department of Medical Cell Biology (now Molecular Genetics), serving as its first Chair from 1969 to 1972. He remained at the University as a Professor until 1985.

From this foundation, Dr. Siminovitch assumed a key leadership position as one of Canada's most renowned medical scientists and scientific builders. He played seminal roles in building research medical capacities, particularly in genetics, at important institutions: as Geneticist-in-Chief at the Hospital for Sick Children from 1970 to 1985; as Director of Research at the Samuel Lunenfeld Research Institute at Toronto's Mount Sinai Hospital from 1983 to 1994; and as an advisor at the Rotman Research Institute at the Baycrest Centre for Geriatric Care.

He served on both public and private medical boards, received numerous honorary degrees, edited the scientific journals *Virology* and *Molecular and Cellular Biology*, and was a founding member of the now-defunct Canadian science journal *Science Forum*. He published over 200 papers, reflecting his pioneering work in the fields of virology,

stem cell differentiation and haemopoiesis, somatic cell and molecular genetics and cancer.

His awards and achievements include a Royal Society Fellowship (England), 1991; the Izaak Walton Killam Prize, 1981; the Gairdner Foundation Wrightman Award, 1981; the Flavelle Gold Medal for the Royal Society, 1978; Officer and Companion of the Order of Canada, 1980, 1989. He was inducted into the Canadian Medical Hall of Fame, 1997 and named a foreign associate to the National Academy of Sciences in 1999.

In addition to his scientific achievements, Dr. Siminovitch alongside his wife Elinore, had a strong passion for the arts, in particular theatre. In honour of his late wife Elinore (1922-1995), the Siminovitch Prize in Theatre was established in 2000 to recognize excellence and innovation in Canadian Theatre.

Dr. Siminovitch passed away on April 6, 2021 in Toronto at the age of 100.

Scope and content

1963-2017, predominant 1978-2007
3.84 m of textual and graphic records (30 boxes)

Personal records of Dr. Louis (Lou) Siminovitch documenting the latter part of his career as a molecular biologist and Head of the Samuel Lunenfeld Research Institute at Mount Sinai Hospital. Includes extensive correspondence subject files with colleagues, family, and friends, along with files related to his numerous speaking engagements.

Access: All files are open, with the exception of:

- Series 1: B2019-0010/017(01) and B2019-0010/019(21)

These files have been restricted to protect the privacy of third parties. Please contact the University Archivist for permission to access these records.

Boxes: B2019-0010/001 - /029
B2019-0010/001P

Other Accession:

B1979-0051 (17 boxes, 1968-1979)

Records documenting Dr. Siminovitch's career in the Faculty of Medicine and the broader field of genetics and public health. Included are records of the Department of Medical Genetics, the Sub-Committee on Science Policy of the Long Range Planning Committee of the Faculty of Medicine, and provincial bodies such as the Ontario Council of Health, Task Force on Genetics, the Ontario Cancer Institute, the Ontario Task Force on Health Research Requirements, the Mount Sinai Institute and many more. There are also editorial case files for the journal Virology, edited by Siminovitch from 1974-1976.

Related material: John Evans fonds, Fraser Mustard fonds, Ernest McCulloch fonds, James E. Till fonds

Series 1: Subject Files and Correspondence

1963-2017, predominant 1978-2007

3.51 m of textual records

Series consists of alphabetical subject files maintained by Siminovitch in his office at Mount Sinai Hospital. Contents of these files vary, but often include a mixture of correspondence with the individual and/or correspondence about the individual,

There are also number of personal correspondence files, including a file of condolence letters for his wife Elinore who died in 1995. Finally, there is also professional incoming and outgoing correspondence from 1987-1993, not filed in the A-Z subject files.

Note: Original order has been maintained.

Access: All files are open, with the exception of:

- B2019-0010/017(01) and B2019-0010/019(21)

These files have been restricted protect the privacy of third parties. Please contact the University Archivist for permission to access these records.

Boxes: B2019-0010/001 - /027

Series 2: Lectures and Talks

[197-]-[200-]

0.26 m of textual records

This series contains records relating to Siminovitch's numerous speaking engagements at conferences, seminars, convocations, meetings of professional groups, luncheons, briefs to committees and government bodies. Files contain notes, working drafts and final copies of talks, as well some related correspondence and his Curriculum Vitae (CV). Topics include: genetics, AIDS, medical research in Canada, and the Samuel Lunenfeld Research Institute (SLRI).

Access: Open

Boxes: B2019-0010/028 - /029

Series 3: Photographs

[196-]-[200-]

0.07 m of graphic records (approx. 70 photographs and 12 negatives)

Photographs and negatives documenting mainly Siminovitch's professional life. Includes formal portraits, views of Siminovitch at professional meetings, speaking engagements, dinners and awards. There are also specific events identified among the mainly unidentified photographs including the following: Malcolm Brown Lecture, Royal College of Physicians and Surgeons of Canada, 1978; the Canadian Medical Hall of Fame, youth symposium, 1999; and the Canadian Foundation Louis Pasteur 1st annual dinner gala, 2002. There are also a series of images documenting a display relating to the Lunenfeld-Tanenbaum Research Institute in the 1980s.

Access: Open

Box: B2019-0010/001P
