Biographical sketch

Melvyn A. Fuss was born in Toronto on 29 March 1940. He received his first two degrees from the University of Toronto: a Bachelor of Science in Mathematics and Physics in 1963 and a Master of Arts in Economics in 1965. This was followed by graduate work at the University of California, Berkeley, from which he received his doctorate in Economics in 1970.

From 1969 to 1972, Professor Fuss was first an instructor and then an assistant professor at Harvard University. He taught principles and the economics of regulation to undergraduates and, to graduates, industrial organization, introductory econometrics, advanced econometrics, and microeconomic theory. In 1972, he joined the Department of Economics at the University of Toronto where, at the undergraduate level, he specialized in microeconomic theory, industrial organization, econometrics, and the economics of regulation. At the graduate level he taught courses in microeconomics theory and econometrics. He retired in 2005 and is now Professor Emeritus.

Professor Fuss has also been active in many administrative positions at the University of Toronto. He was associate chair of the Department of Economics in 1984-1985, departmental chair from 1985-1990, and acting chair in 2000-2001. He has sat on many University committees and also on the Department of Economics tenure, recruiting and other committees. For thirty years he served as a research associate at the Institute for Policy Analysis (1972-2002); also for ten years (1992-2002) at the Centre for International Studies. Outside the University of Toronto, he has been a research associate at the National Bureau of Economic Research (USA) from 1983 to the present.

He was invited twice (1973 and 1987-1988) to be a visiting professor at the Hebrew University of Jerusalem, where he held graduate seminars in production theory and econometrics, and once (2003-2004) at the London Business School. He has also been a visiting scholar at the University of California, Berkeley (1975), at Stanford University (1975-1976) and a visiting research scholar at the Bank of Israel (1987-1988). He has also served on scholarly publishing committees, including being editor of the *Journal of Productivity Analysis* from 1992 to 1995.

Professor Fuss' research activities "have been oriented primarily toward the specification and estimation of cost functions, and the measurement and analysis of productivity. His articles have appeared in journals such as the *American Economic Review*, *Econometrica*, and the *Journal of Econometrics*...[he] is a co-editor of a two-volume treatise, *Production Economics: A dual approach to theory and applications*, considered to be a standard reference work in the analysis of production and cost functions. He has also written a book, co-authored with Leonard Waverman, entitled *Costs and productivity in automobile production: The challenge of*

Biographical sketch (continued)

Japanese efficiency...(1992). Professor Fuss has also co-edited two volumes in the Journal of Econometrics Annuals series: *The econometrics of temporary equilibrium* (with E. Berndt – 1986) and *Essays in Applied Economics* (with R. Gronau and A. Pakes – 1995).¹

Professor Fuss' has also served for many years as a consultant to businesses and governments and is a director of Law and Economics Consulting Group, Ltd. His consulting work has focussed on "the application of empirical methods to regulatory, antitrust, and liability and damage issues, especially in the telecommunications and energy sectors. He has appeared as an expert witness in proceedings at the Restrictive Trade Practices Commission, the Canadian Radio, Television and Telecommunications Commission, the Alberta Public Utilities Commission, the Ontario Energy Board, the Ontario Legislature, the Federal Communications Commission, and the Connecticut Department of Public Utilities Control."² Other organizations to which he has provided advice include the Association of Canadian Distillers, Chrysler Corporation, Union Gas, the United States Postal Service and the Warner Music Group.

Professor Fuss has received a number of honours for his teaching and research. They include the American Telephone and Telegraph Post-Doctoral Fellowship in Public Utility Economics in 1971-1972, a Canada Council Leave Fellowship in 1978-1979, and a Canadian Studies Visiting Professorship, Hebrew University of Jerusalem, 1987-1988.

Professor Fuss is married, with one child.

Scope and content note

Textual, electronic records, 1966-2006, 1.43 m.

Records of Professor Melvyn Fuss, Professor Emeritus of Economics, consisting of correspondence, memoranda, reports, lecture notes, manuscripts and publications documenting his education; his teaching at Harvard University; his administrative duties, teaching and research at the University of Toronto; and his consulting work. Fuss' research has focused on the specification and estimation of production and cost functions and the measurement and analysis of productivity, and his consulting work has been primarily in the telecommunications and energy sectors.

Access: Restricted.

Records designated in series and in appendices are restricted for 30 years. Permission of the donor required. All other records are open.

Series 1: Correspondence

Textual, electronic records, 1971-2006, 0.03 m.

This series begins with a single biographical file, followed by correspondence. Much of Professor Fuss' professional correspondence prior to 1990 has not survived. The paper files in this series are arranged by general correspondence (including by author), followed by references, and then by comments of papers. Much of the post-1990 correspondence is in electronic format, in 'folders'. These electronic folders are listed at the end.

Series 2: Education

Textual, 1966-1970, 0.04 m.

This series consists of two files relating to Fuss' doctoral studies at University of California, Berkeley, between 1966 and 1970. They contain a term paper from Economics 241B (1966) and a copy of his doctoral thesis, 'The time structure analysis of technology: an empirical analysis of the putty-clay hypothesis' (1970).

Access: Open

Box 001, files 14 and 15

Series 3: Administrative files, University of Toronto

Textual, electronic records, 1969-2006, 0.04 m

This series begins with a few paper files relating to the activities of the Department of Economics, including Fuss' employment (1971-1984), recruiting, external reviews, the Department's economic plan, and two reports of the chair (1993, 1994). Most of the administrative files, though, are in electronic format, as e-mail, a general listing of which is found in Appendix 1. They consist primarily of correspondence, memoranda and reports of an administrative nature after Professor Fuss stepped down as chair of his department in 1990 (he was acting chair in 2000-2001) and continuing through 2006 (compact disc #2). There are also a number of electronic files on student appeals, Fuss' sabbatical in 1993-1994, and his trip to Israel in 1997 (compact disc #4), and e-mail files (compact disc #5), 2000-2005, grouped in folders and sub-folders under the following categories: 'Chair memos' [by the chair of the Department of Economics], and files on 'Computing', 'Economics' and 'Recruiting'.

Access: Restricted. See Appendix 1 for details.

For a detailed listing of the contents of this series, see Appendix 1.

Series 4: Teaching files

Textual, electronic records, 1969-2005, 0.78 m

This series focuses on Professor Fuss' teaching career, almost entirely at the University of Toronto, though there are three files on courses he taught at Harvard University between 1969 and 1972. The files contain memoranda and correspondence, notes, course outlines, lecture notes, problem sets, questions for tests and examinations, and some anonymous course evaluations. References to student marks have not been retained. This portion of the series ends with a number of electronic files.

At Harvard Professor Fuss taught principles and the economics of regulation at the undergraduate level and industrial organization, introductory econometrics, advanced econometrics, and microeconomic theory at the graduate level. The surviving files in this series are for the undergraduate course on business organization and public policy and the untitled graduate courses 2210A and 2240A.

The series continues with courses given at the Erindale campus and the St. George campus of the University of Toronto. At the undergraduate level he taught courses in microeconomic theory, industrial organization, econometrics, and economics of regulation. At the graduate level he taught microeconomics theory and econometrics. Included in these are lecture notes given to Professor Fuss by Daniel McFadden at the University of California, Berkeley (where Fuss took his doctorate), and Dale Jorgensen at Harvard University.

Most of the files are in paper format, but there are some electronic files, partly in the form of e-mail. The arrangement is by course number within each institution.

Series 6: Consulting

Textual, electronic records, 1991-2004, 0.02 m

Professor Fuss has served as a consultant to government and industry for many years, but only two projects are documented in this series, his work as a member of the Price Measurement Advisory Committee at Statistics Canada and a study he did for United Communications Ltd. on long distance telephone service in Canada.

Access: Open

	CD #4	'Correspondence: 'Statcan' file. Price Measurement Advisory Committee	1991-1992
	CD #5	Folder: 'Statistics Canada'. Files re Price Measurement Advisory Committee, on Compact disc #5, 'Fuss e-mails'.	2003-2004
/007	(30)	Unitel Communications Ltd. Final preliminary drafts of two reports by Fuss on public long-distance telephone service in Canada.	1991

Series 7: Research

Textual, electronic, 1987-2002, 0.03 m.

This series consists of grant applications and related research files for projects, the results of which were all published. They do not comprise the whole of Professor Fuss' research projects, published or not. The paper files contain the applications, covering correspondence, and reports. The arrangement is chronologically by project.

Professor Fuss' compact disc #3, titled 'Research', contains a large number of files on research projects, arranged by folder, sub-folders and files. Where the results were published, files that could be were printed out and filed in Series 8: Manuscripts and publications. Some files were also printed out and placed in Series 1: Correspondence. Only files that could not be printed, or where formatting made tables and mathematical formulae incomprehensible, or the files were extremely long, are listed.

B2006-0013

Melvyn A. Fuss

Access: Restricted Textual, electronic records 1965-2006 1.43 m

Series 7: Research (continued)

There also research files on compact disc #5 [‘Professor Fuss’ e-mail’], a listing of which is included, along with the contents of the rest of this series, in Appendix 3.

Access: Open

/Box	(file)	Description	Date(s)
/008	(01)–(07)	Research projects	1987-2002
CD #3	Folder	‘Research’	1990-2006
CD #5	Folder	‘Research’	1997-2004

Series 8: Manuscripts and publications

Textual, 1976-2006, 0.78 m.

The section in Professor Fuss’ curriculum vitae that relates to his written works is divided into several sections: books and monographs, articles, published research reports, other publications, unpublished research reports, and unpublished papers. In this series, that system has not been followed – the arrangement is chronological by date of latest draft of the paper or date of publication. The files contain any combination of: covering correspondence, contracts, drafts of papers and final copies, offprints, reviews, and royalty payments.

Professor Fuss is the author of five books and monographs and over forty published articles; many are not represented in this series. For example, of his five published research reports, four of which focus on the demand for and cost of energy in manufacturing, and the last is on the regulation of telecommunications in Canada, none is present in this series. The other major gap is with his published articles; about 30 are missing. On the other hand, most of Professor Fuss’ “unpublished papers”, largely working papers series of the University of Toronto’s Department of Economics and its Institute for Policy Analysis, the National Bureau of Economic Research (USA) and the London (England) Business School; are present. His “unpublished research reports”, done for federal and provincial governments; are also well represented. Only one publication after 2001 is documented.

Access: Open
