William Edward Gallie fonds

Dates

[189-?] - 1963

Extent

1.45 m of textual records, .36 m of graphic records: 85 photographs; b&w, 4 x-rays, 16 illustrations/sketches, 36 glass plate slides, 1 reel of 16mm film

Biographical Sketch

Dr. William Edward Gallie (1882-1959) was a pioneering orthopedic surgeon and Dean of the Faculty of Medicine at the University of Toronto. He was born on January 29, 1882 in Barrie, Ontario to William Gallie, a building contractor and mill operator, and Anne Gray. Gallie graduated from Barrie High School in 1899. Finding the work of his father uninspiring, Gallie entered the Faculty of Medicine at the University of Toronto at the age of 17. Gallie graduated in the spring of 1903, and immediately began work as an intern at Toronto's Hospital for Sick Children (1903-1904). Gallie spent the next several years interning at the Toronto General Hospital (1904-1905) before moving to New York's Hospital for the Ruptured and Crippled (1905-1906).

Upon completion of his internship in New York, Gallie returned to Toronto and gained employment at the Hospital for Sick Children. Concurrently, Gallie was appointed junior surgeon at the Toronto General Hospital, a position he held until 1910 when he shifted his focus solely to the Hospital for Sick Children and became an assistant to the Chief of Orthopaedic Service, Dr. C.L. Starr. Starr taught Gallie as a pupil at the University of Toronto, supervised him through his initial internship at the Hospital for Sick Children, and would become Gallie's mentor as a young surgeon at the Hospital.

From 1906-1910, Gallie developed a strong research interest in the surgical correction of paralysis. A proponent of animal experimentation to improve surgical techniques, Gallie developed a method of tendon fixation to stabilize paralytic feet and began publishing papers on the topic, bringing him a great deal of recognition amongst his peers.

In 1914, Gallie married Janet Louise Hart with whom he had 3 children; Alan Edward, Marion Louise, and Hugh Richmond.

The outbreak of the First World War saw the departure of many Canadian doctors as they joined the Canadian Expeditionary Force overseas. Gallie's fellow surgeons at the Hospital for Sick Children, Dr. Starr, Dr. D.E. Robertson, and Dr. B. Robertson all joined the war effort. Gallie remained the lone surgeon at the hospital until 1917, when he replaced Starr in England at the Canadian Special Treatment Hospital. While serving for the Canadian Expeditionary Force, Gallie graduated to the rank of Major (Act.) before the end of the war.

When Gallie returned to Canada, he became the Surgeon-in-Chief at the Hospital for Sick Children, a post he held until 1929. During his time at the helm of the Hospital for Sick Children, Gallie began some of his most famous surgical experiments, publishing papers on the transplantation of fascia

William Edward Gallie fonds

into tendons, and applying the method to the treatment of hernias and to the repair of anatomical defects.

In 1929, Gallie replaced Dr. Starr as the Professor of Surgery at the University of Toronto. Gallie was also appointed Surgeon-in-Chief of the Toronto General Hospital, a position he held until 1936 when he became Dean of the Faculty of Medicine at the University of Toronto. During his time at the U of T, Gallie established a training regimen for medical students that qualified them to become part of the Royal College of Physicians and Surgeons of Canada. This move helped bring medical training in Canada on par with the courses in England and the United States. When the Second World War broke out, Gallie helped to establish a program for Canadian military surgeons to return home for 6 month periods in order to share their experiences with their University. Gallie also served as the President of the American College of Surgeons from 1941-1946.

Gallie formally retired from his position at the University of Toronto in 1947, but continued to aid the medical profession by delivering lectures, addresses, and establishing scholarships and trust funds for medical students.

William Edward Gallie died on September 25, 1959 at the age of 77.¹

Scope and Content

The William Edward Gallie fonds consists of 6 series based largely on his work as a surgeon at the Hospital for Sick Children and the Toronto General Hospital, as well as his role at the University of Toronto as Dean and Professor at the Faculty of Medicine. The majority of the records relate to Gallie's publications, lectures, public addresses, and research. The fonds also includes a small amount of personal ephemera such as event invitations and newspaper clippings. The W. E. Gallie fonds consists of the following series: 1) Writings & Publication Drafts, 2) Lectures and Public Addresses, 3) Research, 4) Correspondence, 5) Personal Ephemera, and 6) Photographs & Graphic Materials.

Custodial History

This collection of records was offered to the University of Toronto Archives by the Canadian Medical Hall of Fame. It is unclear where the records were kept between the time of Gallie's death and their arrival at the U of T Archives, however annotations on some of the publications indicate that Gallie's son, Hugh, may have had custody of the records at one point.

Arrangement Notes

The records in the Gallie fonds arrived with no clear order and have been placed into series largely based on subject and content.

¹ The majority of the biographical information found on W.E. Gallie is taken from a eulogy written by R. I. Harris, which is included in this collection in B2013-0001/008(21)

Restrictions on Access

Patient records are restricted under the *Personal Health Information Protection Act* (PHIPA). See series and file level descriptions for details. The rest of the fonds is open.

Series 1 – Writings & Publication Drafts

Dates

[ca.190-] – [ca.1959]

Extent

.29 m of textual records, 18 photographs; b&w

Scope and Content

This series consists of W. E. Gallie’s writings, manuscripts and reports that eventually went to publication. The series consists of both typed and handwritten reports, drafts, some correspondence related to copying and publishing, and in some cases, medical photographs or images have been attached as figures. A bibliography of many of Gallie’s works is included. Some of the publications in this series are co-authored by Gallie and Dr.’s Robertson, LeMesurier, and Janes. The files in this series have been arranged in chronological order. The titles for the files in this series reflect the given title of each report, if one exists.

Arrangement Note

The photographs that exist in this series directly relate to textual information found within the files. Photographs that were not found within the textual records below, but may relate directly to the content of the file have been cross-referenced with their photographic reference number and location from Series 4 – Photographs & Graphic Materials.

Series 2 – Talks, Lectures and Addresses

Dates

[ca.191-] – [ca.195-]

Extent

.24 cm of textual records, 9 photographs; b&w, 3 x-rays, 1 sketch

Scope and Content

This series consists of numerous talks, lectures and addresses which W.E. Gallie presented to various conferences, graduating class receptions, and medical lectures. The file titles in this series represent the content of the lecture as well as the audience, if one has been provided. The files in this series have been arranged in chronological order.

Arrangement Note

The photographs that exist in this series directly relate to textual information found within the files and have not been separated in an effort to maintain original order.

Access Restrictions

Files in this series containing patient information are restricted under the *Personal Health Information Protection Act* (PHIPA). Restricted files are indicated in both the finding aid and on the physical file.

Series 3 – Research

Dates

1909 – 1953

Extent

.10 m of textual records, 8 photographs; b&w

Scope and Content

This series contains research notes and journals covering a range of W.E. Gallie's medical work as well as a small collection of research papers written by other doctors and annotated by Gallie. Gallie's journal documenting his experiments on animals – mainly dogs – is in this series. Some of the files contain correspondence regarding certain research projects. The files in this series are arranged chronologically.

Arrangement Note

The photographs that exist in this series directly relate to textual information found within the files and have not been separated in an effort to maintain original order.

Series 4 – Correspondence

Dates

1904-1959

Extent

.26 m of textual records, 14 photographs; b&w, 1 x-ray

Scope and Content

This series contains a mixture of both personal and professional correspondence belonging to W.E. Gallie. Notable collections within this series include letters written to and from Colonel J.A. MacFarlane, Consulting Surgeon, Canadian Army Overseas, correspondence with Dr. W.G. Bigelow, and correspondence with well-known American Surgeon Dr. Rudolph Matas. The files in this series are arranged chronologically.

Arrangement Note

The photographs that exist in this series directly relate to textual information found within the files and have not been separated in an effort to maintain original order.

Series 5 – Personal Ephemera

Dates

1895-1963

Extent

.55 m of textual records

Scope and Content

This series contains a range of W.E. Gallie's personal ephemera. Files include banquet invitations and programs, copies of high school examination forms, certificates, travel souvenirs, invitations to lectures, newspaper clippings and a large scrapbook. The scrapbook contains newspaper clippings, correspondence, manuscripts, dinner programs, and an invitation to Gallie's wedding. Some of the files in this series, notably the newspaper clippings and scrapbook, may have been collected by Gallie's wife and children.

Series 6 – Photographs & Graphic Material

Dates

[ca.191-]-1955

Extent

.36 m of graphic records; 48 photographs, 15 illustrations, 36 glass slides, 1 reel of 16mm film

Scope and Content

Files in this series contain photographs, and graphic materials relating to Gallie’s professional and personal life. Many of the photographs are miscellaneous figures and graphics that may have been used in papers, lectures, and talks. This series also includes a film of one of Gallie’s operations. The files in this series have been arranged chronologically.

Notes

Glass slides from B2013-0001/003P (1) to (8) are in very poor condition and some have broken or sharp edges.
